OBJECTIVE

Motivated Computer Science student at Rutgers University seeking internship opportunities to apply programming knowledge, problem-solving skills, and enthusiasm for software development. Eager to gain industry experience and contribute to innovative projects.

EDUCATION

Rutgers University, Newark

Bachelor of Science in Computer Science, Expected Graduation: 2028
GPA: 3.9

COURSE WORK

- Advanced Data Structures & Algorithms
- Machine Learning & AI
- Linux System Programming

WORK EXPERIENCE

Carnegie Dinner & Cafe, Secaucus, NJ
Server/Expeditor
October 2024 - December 2025

- Maintained strong multitasking skills while serving **10+ tables** at the same time during peak hours.
- Managed and organized **300+ food orders per shift** with precision and attention to detail in a fast-paced environment.
- Trained new team members on menu knowledge, service procedures, and point-of-sale systems.

The Braven Accelerator, Newark, NJ
Fellow
January 2026 - Present

- Developing workforce skills such as leadership, operating and managing, communicating and networking, working in teams, and problem solving by completing a 14-week leadership and professional development course.
- Designing a career roadmap by engaging in a 7-step process that requires self-assessment and reflection, as well as role investigation and evaluation to determine the steps required to achieve career goals.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C, Linux, HTML, CSS
- **Developer Tools:** VS Code
- Fluent in English and Spanish, enhancing communication with a diverse clientele.
- Excellent customer service and interpersonal skills

PROJECTS

- **To-do List-**Developed a **Java-based** To-Do List application using object-oriented programming principles, enabling users to add, view, and mark tasks as completed through an interactive console menu.
- **Climate Change Website-** Collaborated with a team of students to design and build a responsive website on climate change using **HTML** and **CSS**, focusing on awareness and environmental impact.
- **Inventory Management System-** Built a console-based Inventory Management System in **Java** that allows users to add products, manage stock levels, and compute total inventory value using classes, ArrayLists, and user input handling with Scanner.
